

A P P O I N T M E N T

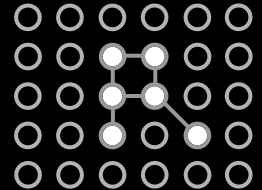

Research.bm is pleased to announce the appointment of Leslie Steede as Research Manager. Leslie has a strong academic background in research methods and statistics and has successfully managed and completed many research projects. In addition, he has had several papers published in international psychology journals.

Leslie completed formal training in Psychology at the Bermuda College (Associates Degree), University of Waterloo, Canada (Honours B.A.), and the University of Sussex, UK, where he received an M.A. with distinction as well as a Certificate in Advanced Statistical Analysis. He is currently a Ph.D. candidate due to complete in the summer of 2007.

“I am excited to come back to Bermuda and find a local company operating at this level. I had thought I was more suited to an academic career which would entail me living away from Bermuda and my family. I am very happy, and so are my family, that this opportunity has presented itself”.

Research.bm looks forward to introducing Leslie to all of its clients and, on the occasion of the company’s 5th anniversary this month, would like to take this opportunity to thank their clients for their support and dedication.
